EDUCATION

B. E. in Computer Science Engineering (Data Sci.)
RV College of Engineering
9/2024 - Present *CGPA 7.93*

Diploma in Computer Science and Engineering
S. V. Polytechnic, Kumta (U.K), Karnataka
08/2021 - 05/2024 *CGPA 9.85*

SSLC
S. H. S. Hiregutti, Kumta (U.K), Karnataka
06/2018 - 07/2021 *Percentage 97.14*

SKILLS

HTML | CSS | JavaScript | React JS
Node JS | Express JS | Spring Boot
MongoDB | SQL | C/C++ | Python
JAVA | Data Structures | Figma

PERSONAL PROJECTS

BIOMAT(Bio materials Database)
- Built a web application using React.js and MongoDB to recommend biodegradable materials for packaging, construction, and textiles.
- Designed a responsive and eco-friendly UI to help users explore sustainable alternatives based on real-world use cases.
- Integrated frontend-backend communication to fetch and display material data, enabling informed, environment-conscious decisions.

Sign Speak (Opencv)
- Developed a real-time hand gesture recognition system using Python, OpenCV, and MediaPipe.
- Enabled hands-free communication by mapping gestures to contact selections with dynamic visual feedback.
- Designed a clean user interface to assist speech-impaired users in making quick and accessible selections.

Flight Route Optimization System
- Developed an interactive Flight Route Management System using React, TypeScript, and graph algorithms (Dijkstra, A*, Prim) for optimal air route planning.
- Integrated real-world mapping (Google Maps, Deck.gl) and weather APIs to simulate dynamic conditions and disruptions.
- Enabled educational and analytical visualization through dual graph/map views and algorithm comparison panels.

Student Management System(Spring Boot + Thymeleaf)
- Implemented a full-featured **Student Management System** using Spring Boot, Thymeleaf, Spring Data JPA, and MySQL to efficiently manage student profiles, marks, and attendance via intuitive CRUD interfaces.
- Secured the application with Spring Security for staff registration and role-based login, ensuring authenticated access to Home, About, Contact, and logout functionalities.
- Designed responsive frontend pages with HTML, CSS, JavaScript, and Thymeleaf, deployed using Maven for streamlined builds and seamless user interaction.

AREA OF INTERESTS

Full-Stack Development | Artificial Intelligence
UX/UI Design & Visualization | Cloud Computing
System Design

HOBBIES/INTERESTS

- Building personal web projects
- Participating in coding competitions & hackathons
- Participating in club activities
- Puzzles and strategic games

LANGUAGES

English
Professional working proficiency

Kannada
Native full proficiency

Hindi
limited working proficiency
